SUMMARY

Full-stack developer who enjoys solving real problems. I have built modules for an ERP used in several countries and my own products with online payments and AI. I work independently, learn fast and communicate clearly. Looking for a remote, Spanish-speaking team.

✓ Own products in production with real payments

✓ AI integration: assistants and agents

✓ Android app published on Google Play

EXPERIENCE

Founder & Full-Stack Developer

2026 – Present

DeyviDev · Own products

- Design, build and maintain web products in production.
- A booking SaaS, a platform for law firms, an online store with payments and a news site with an Android app.

Next.js

TypeScript

Firebase

Supabase

PostgreSQL
